

Codec analysis at engineering scale.

A focused desktop analysis platform for teams debugging H.265/HEVC encoding workflows.

ANNUAL PLAN

USD 4,999 / year

Taxes excluded. Final scope is confirmed in a signed order.

INCLUDED CAPABILITIES

- Organization-wide access
- Custom deployment and security review
- Pipeline integration guidance
- Dedicated support channel
- Annual invoicing

DELIVERY

Provisioned after a signed order and payment confirmation.

Access, deployment, and support details are recorded in the order.

A clear path from evaluation to an Enterprise order.

PURCHASE PROCESS

- Contact CodeLens with your organization and deployment needs.
- Confirm scope, security review, invoicing, and support expectations.
- Sign the order and complete annual payment before provisioning.

PLAN BOUNDARIES

The public annual price covers the capabilities listed in this document. Exact seat, deployment, integration, and service commitments are defined in the signed order. Custom engineering is not included unless stated there.
